

DISCLAIMER : THE INFORMATION PROVIDED HERE IS AT A HIGH LEVEL AND IS NOT EXHAUSTIVE. DETAILED INFORMATION WILL BE PROVIDED AT THE TIME OF YOUR CONSULTATION ALONG WITH A COMPREHENSIVE INFORMED CONSENT FORM.

PRE TREATMENT INSTRUCTIONS

- To minimize the risk of bruising, we advise to avoid any drugs or substances that can thin the blood 48 hours before treatment. This includes anti-inflammatories like Advil/ibuprofen, Alive or Aspirin, alcohol, and supplements such as Omega Fatty Acids, Ginkgo Blob, Ginseng and St. Johns Wort
- You should schedule your injectable appointment at at least 2 weeks prior to a special event which you may be attending, such as a wedding or a vacation
- Results from the treatment can appear as early as 24-48 hrs, but typically occur 4-7 days post treatment. We advise waiting 14 full days to see the final effect
- Reschedule your appointment at least 24 hours in advance if you have a rash, cold sore or blemish on the area
- If you have a history of cold sores please let your provider know, they may put you on an anti-viral medication prior to treatment
- You are not a candidate if you are pregnant or breast feeding

POST TREATMENT INSTRUCTIONS

- Do not rub or massage the treated area for 24 hours after the treatment and do not have a facial, hot tub, sauna or strenuous exercise for 24 hours as well
- We would like to touch base in 2 weeks, especially if this was your first treatment. This will ensure that we are able to see how your facial muscles reacted to your treatment. If you require more of the product, to fine-tune or adjust your treatment results, it can be applied during this appointment
- Contact us if you have any concerns
